- Waste to Energy programs (Zero Waste)

Our Company

VIM Recyclers, L.P. has been in the recycling business over 40 years providing recycling programs and the equipment, moving and marketing the recyclable materials and reducing your company's environmental impact.

In order to help us provide a comprehensive proposal for your company and understand your current recycling needs we recommend an on-site visit of your facility enabling us to fill out a Facility Survey based on your current waste streams.

Benefits of the VIM Program

Reduce your overall waste costs and environmental footprint through waste diversion!

Full scale recycling—remove, process, and market multiple recyclable materials on the same trailer.

Provide and maintain the tools to recycle—Balers (vertical & horizontal), Trailers, and Conveyors.

Custom design, implement and maintain recycling equipment and programs based on your needs.

Provide recycling reports for review that detail your recycling data (pick-ups, weights, materials).
